ADD VALUE AND SPACE TO YOUR LANDSCAPE

Are you looking for an innovative solution to your deck dilemma? Make use of the space below your second-story deck with UnderDeck. An all-weather UnderDeck transforms the underside of new and old decks into clean, dry, bright spaces perfect for:

- outdoor retreats
- dry storage
- screened enclosures
- and more

HOW IT WORKS

UnderDeck attaches to the underside of elevated decks, creating a durable, maintenance-free ceiling drainage system. Water flows through overhead deck boards to a series of collector panels and joist gutters that direct water away from the dry, livable space below. When it is time for deck repairs or cleaning, UnderDeck components are easy to remove.

Choose from two distinct looks for transforming the underside of decks. Each product series is stocked in space-brightening white and tan. Visit UnderDeck.com for more pictures or call 877-805-7156 to ask us about special orders.

ARCHITECTURAL DESIGN SERIES

Offers a coffered beam look with the architectural flair of crown molding.

PRO SERIES

Offers a distinct linear look with a slight radius on the lower edge of the joist gutter.

WARRANTY

UnderDeck's tough-construction components make it easy to install with confidence. Homeowners receive a 15-year warranty on defects. See complete warranty details at UnderDeck.com.

CUSTOMIZABLE INSTALLATION

Innovative, all-weather, components make UnderDeck perfect for homeowners with new or existing decks.

Design custom spaces that leverage the flexibility of UnderDeck by including:

- lights
- fans
- swings
- hanging plants
- audio/video system
- screened-in patios

UnderDeck components fit virtually any deck with standard sizes that accommodate 12, 16 and 24 inch on-center joist spacing. They can be easily trimmed to accommodate unique openings or angled corners.
